

GENUINE FOODS & EQUIPMENTS

(ISO 9001:2015 Company)

(Bring out the Nature & Purity)

Geniune foods & equipments is specialized in design, development and supply of Cleaning, grading, powderring processing systems (Hammer mills, Pulverizes), Sieving, Screening (Circular and rectangular design), Magnetic equipments (Plate, Tube and Grill magnets, Manual and self-clean Grate housing magnets, Liquid or Slurry magnetic Inline filters, Suspended magnets) Conveyor metal detector, Pipe line metal separator equipment accross various industries. Our registered office is located in Chennai, South India. Also we offer a 2,300sqft manufacturing and testing facility located in Coimbatore, Tamil Nadu.

PULVERIZER AND HAMMER MILLS

Hammer mill or Pulverizer can be used for size reduction of soft materials up to Mohs scale 3. The mill is equipped with pins and plate beater as option to fulfil the various product demands.

MAGNETIC EQUIPMENTS

We provide complete magnet equipments include Tube magnet, Plate magnet, Grill magnet, Drum and Roll Magnet separator, Suspended permanent magnet with 2,000/ 5,000/ 10,000/ 12,500 Gauss Power.

MAGNETIC DRUM AND ROLL SEPERATOR

Magnetic drum and Roll separators are roll type dry magnetic separators with fixed magnet having high field intensity and gradient. The magnets used in the Roller magnetic separators or made of rare earth elements alloys and are more powerful as compared to other magnets.

MAGNETIC & MEDIA FILTER

MAGNET & METAL SEPERATOR

Grate housing Grill magnet removes all type of ferrous contamination (0.1 mm to bigger Tramp metal, Metal Separators sense and remove the presence of ferrous, nonferrous and stainless metals in a process as a packaged item. All food-grade (or higher) come standard with Metal-Detectable Gaskets & Grommets.

METAL DETECTOR

The compact metal detection system offers safe performance and highest detection sensitivity with its robust stainless steel conveyor belt construction the inspects piece goods of from 50 gram to 50 kg packed products.

VIBRATORY EQUIPMENTS

ELECTROMAGNETIC FEEDER

VIBRO MOTOR

PNEUMATIC VIBRATOR

HAMMER VIBRATOR

BIN ACTIVATOR

VIBRATING DESTONNER

CIRCULAR VIBRO SCREEN

RECTANGULAR VIBRO SCREEN

Vibrating and Conveying equipments:

Our vibrating equipments are used for feeding, hopper vibrating, product screening applications. It is also known as Gyrotary Screen, Vibro Shifter, Circular Screen Separator etc. Our rectangular and circular screen separator comes with many special features. Our screen separator is known for their high performance, innovative design and affordable prices making them extremely popular among customers.

FEW OF OUR CUSTOMERS

LAB AND TESTING CENTRE:

WE OFFER A 400 SQ FT LAB FACILITY FOR THE FOLLOWING ANALYSES:

- **HEAVY METAL TESTING:** IDENTIFIES THE PERCENTAGE OF FERROUS AND NON-FERROUS CONTAMINATION IN PRODUCTS.
- **PARTICLE SIEVE ANALYSIS:** ASSESS THE PARTICLE SIZE DISTRIBUTION USING A VIBRATING TEST SIEVE.
- **CIRCULAR AND RECTANGULAR SHIFTERS:** DETECTS FOREIGN MATERIALS, INCLUDING MINOR HAIR FOLLICLES, PLASTIC THREADS, EGGHELLS, WORM NESTS, AND OTHER UNWANTED SUBSTANCES.
- **ENSURE QUALITY, SAFETY AND COMPLIANCE WITH COMPREHENSIVE CONTAMINANT TESTING SOLUTIONS IN LINE WITH MARKET REQUIREMENTS. ALSO WE ASSOCIATE WITH SGS, SK MITHRA LAB FOR OTHER TESTING WORKS.**
